**Student Learning Outcomes**

Interdisciplinary Studies
Bachelor in Interdisciplinary Studies

1. Interdisciplinary Studies (IDS) majors learn how to integrate ideas across disciplines and incorporate distinct perspectives in their learning processes.

2. IDS students will create an ROK (Review of Knowledge) from which they will create a reflection paper for the purpose of integrating disparate fields of study from their Integrative Learning Plan and demonstrate an understanding of integrative learning.

3. IDS students will analyze connections to their ILP disciplines based on the Integrative Learning Value Rubric adapted from the Association of American Colleges and Universities.

4. IDS students will learn how to apply their connections across disciplines to their real-world experiences.

5. IDS students will reflect on their journey through higher education as aware learners using integrated communication.

6. IDS students will complete their degree in Interdisciplinary Studies with an understanding of integrative learning as it relates to the attainment of educational and professional opportunities.
